## ICE MACHINE CLEANING

### Cleaning and disinfection guide

## **EC4** Sanitiser

#### SUPER CONCENTRATE SANITISER

Kills a wide range of bacteria and yeast. Passes EN 1276 under dirty conditions with a 30 second contact time.

Consult manufacturers' guidelines before cleaning and disinfecting your machine. If your machine has an automatic wash programme follow the method below for removable parts only.

#### CONCENTRATION

Make up a solution of EC4 at a dilution rate of 1:60 in a spray bottle (10ml per 600ml water)

#### **EQUIPMENT**

Trigger spray bottle, bucket, disposable cloth, soft nylon brush and warm water.

#### MANUAL CLEANING AND DISINFECTION METHOD

- 1. Unplug machine, turn off water supply (if applicable) and leave to defrost.
- 2. Empty machine of all ice and water using a plastic scoop. Never use a glass, there may be a risk of glass fragments being left in the machine.
- 3. Remove any components, which can be cleaned separately, as per the machine's instructions.
- 4. Prepare a solution of EC4 in a trigger spray bottle.
- 5. Spray EC4 inside and outside of the machine and clean with a disposable cloth and soft nylon brush, if required, ensuring that any dirt or slime is removed.
- 6. To disinfect, spray EC4 inside and outside of the machine and leave for 30 seconds
- 7. Rinse using clean water in a bucket and wipe with a clean cloth.
- 8. Leave to air dry.
- 9. The components can be cleaned and disinfected using the same procedure above.
- 10. Replace the removable components.
- 11. Plug the machine back in and turn on the water supply (if applicable).
- 12. Restart the machine.
- 13. Discard the first batch of ice.

# procedure above. able).

#### **INSPECT MACHINE REGULARLY**

For build-up of dirt, rust, limescale and mould.

#### **MAINTENANCE PROGRAMME**

Include cleaning and disinfection of the ice machine in your equipment cleaning programme.
