

# Lact-8™

## Ready-to-use chlorhexidine gluconate and lactic acid disinfectant

Easy to use long lasting barrier film containing Chlorhexidine Gluconate, Lactic Acid and high levels of Glycerol and Allantoin.

Highly visible pink colour to indicate which cows have been effectively dipped.

Passes EN 1656. Rapidly kills bacteria. Effective against mastitis causing organisms.

- Ready-to-use and contains a unique film-former that is very durable and flexible allowing longer contact time for better protection.
- Effective against a wide range of organisms in the presence of organic matter.
- Contains high levels of Glycerine and Allantoin which soothes and softens the skin reducing cracks and crevices where bacteria may multiply.
- Passes European disinfectant test method EN 1656.

### No dilution required.

#### POST-MILKING DIPPING:

Fill teat cup approximately two thirds full with Lact-8™. No dilution is required.

Dip teats of every cow immediately after each has been milked, making sure that the full length of the teat is immersed. Top up with fresh solution as required.

Empty and wash out cups after milking.

Ensure any remaining Lact-8™ is removed and teats are cleaned before the next milking.

25 L

**Order Code: R022KEV**

Pack: 25 litre

200 L

**Order Code: R022NEV**

Pack: 200 litre

#### PRODUCT INFORMATION:

Appearance:	Bright pink viscous liquid
Odour:	Sweet
pH - undiluted:	3.0
Shelf life:	1 year

#### QUALITY AND ENVIRONMENTAL ASSURANCE:

This product is manufactured in the U.K. by EVANS VANODINE INTERNATIONAL PLC under an ISO 9001 Quality Management System Cert. No. FM 09535 and an ISO 14001 Environmental Management System Cert. No. EMS 506072 registered by the British Standards Institution.
