

Welcome to the Evans Vanodine

COSHH Risk Assessment Portal.

This guide has been developed to introduce and help walk you through the steps to using and creating COSHH Risk Assessment Reports within the portal.

The reports created and information given in this risk assessment portal are for guidance use only. You are responsible for COSHH compliance within your organisation.

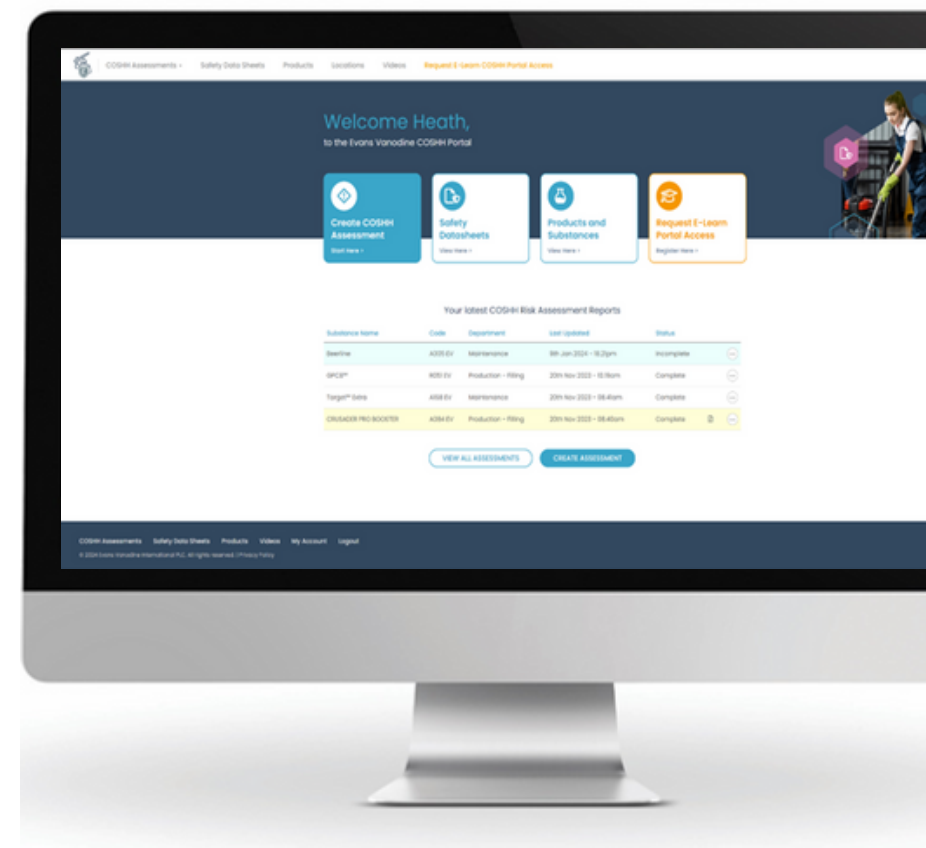

What is a COSHH risk assessment?

COSHH stands for Control of Substances Hazardous to Health, and a COSHH risk assessment is a process of evaluating the risks associated with exposure to hazardous substances in the workplace. This assessment is an essential part of health and safety management and helps employers identify the necessary precautions to protect their employees from potentially harmful substances.

A COSHH risk assessment involves identifying the hazardous substances present in the workplace, evaluating the risks associated with them, and implementing control measures to minimize the risks. The assessment should include factors such as the nature of the substance, the likelihood of exposure, the duration of exposure, and the potential health effects. Control measures may include measures such as replacing hazardous substances with less harmful alternatives, providing personal protective equipment to employees, or ensuring that the workplace is properly ventilated. Regular reviews of the assessment should be conducted to ensure that the control measures are effective and up to date. In conclusion, a COSHH risk assessment is a crucial process in maintaining a safe and healthy workplace by identifying, evaluating, and controlling the risks associated with hazardous substances.

A competent person from your organisation is required to conduct COSHH risk assessments. A competent person is someone who has the necessary skills, knowledge and experience to carry out a particular task safely and effectively.

To assist our customers, Evans Vanodine offer a free COSHH E-Learn Portal Access (ROSPA approved) which can be found on the Dashboard Screen.

Welcome to the Evans Vanodine COSHH Risk Assessment Portal.

Please note: If you are not an existing user and require registration for a new account please [click here](#) or proceed to page 4

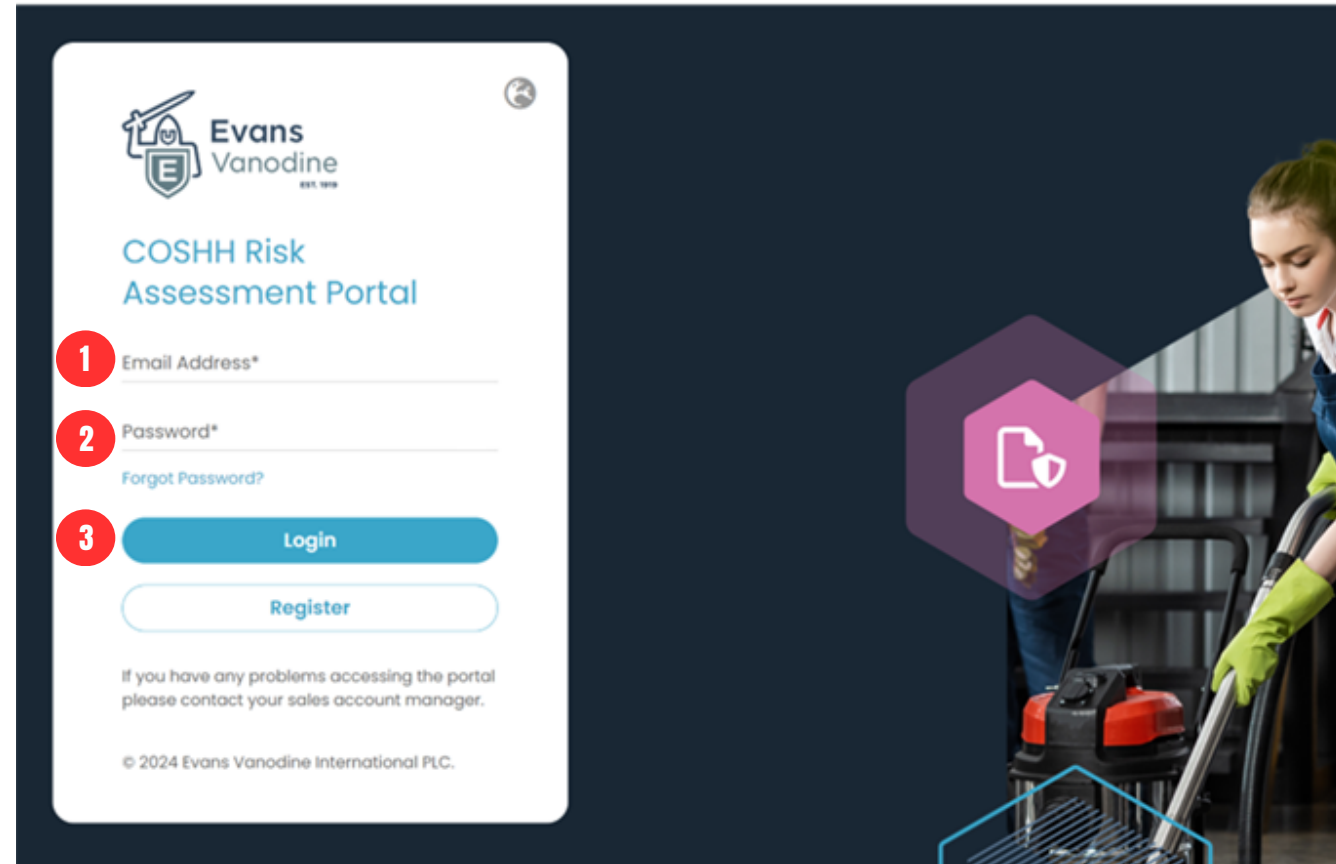

Accessing the COSHH Risk Assessment Portal Existing Account Users

To begin using the newly updated COSHH Risk Assessment Portal, you will first need to enter your email address, followed by your password.

- 1 Click inside the Email Address field and type into the box, your email address.
- 2 Click inside the Password field and type your password into the box .
- 3 then click the Login Button to proceed.

You will now be re-directed to your new Dashboard Screen to proceed [Click here](#) or go to page 7.

Please note: If you have any problems assessing the portal, please contact your sales account manager

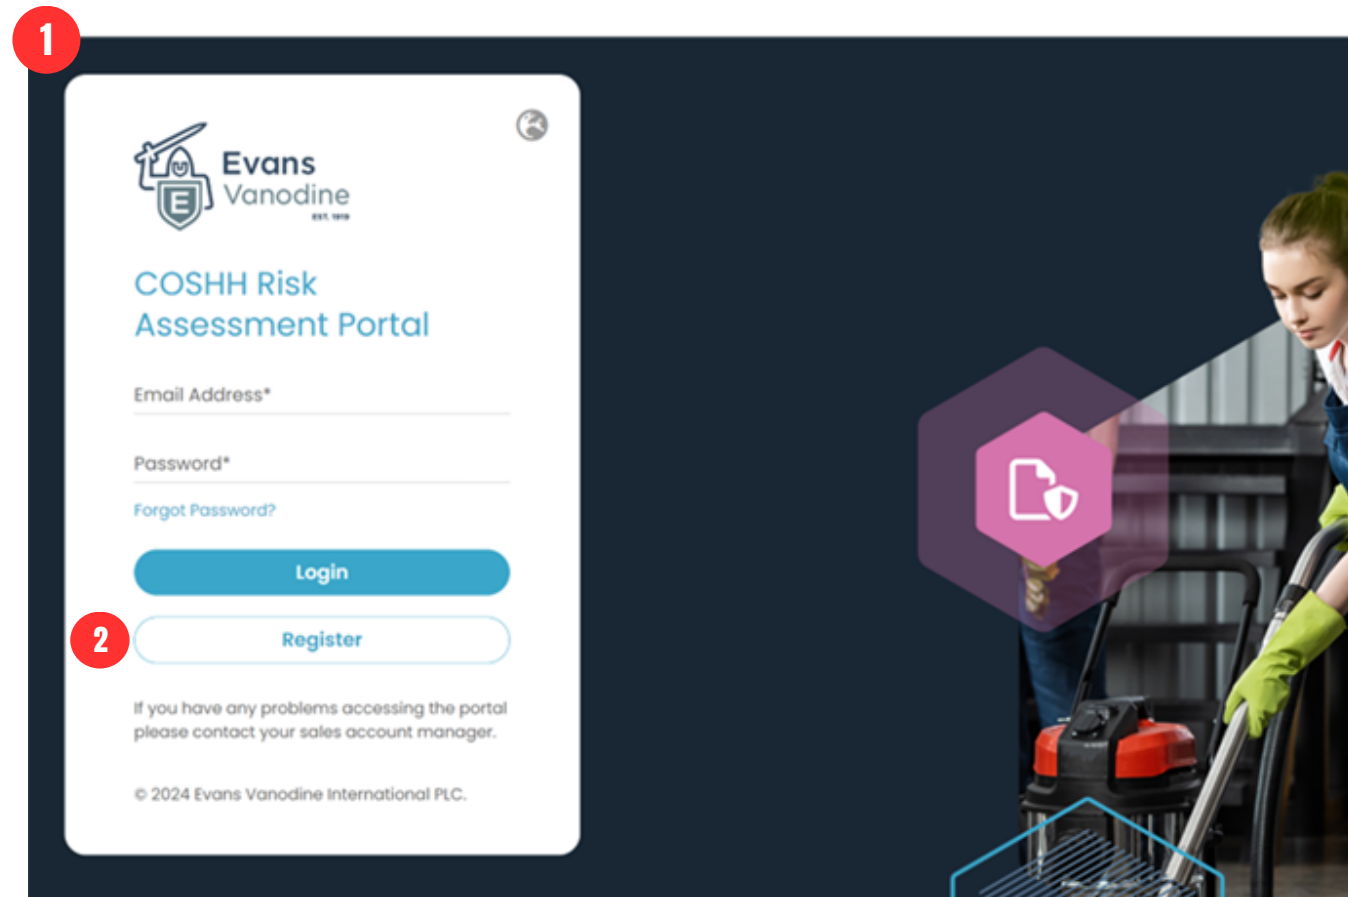

Welcome to the Evans Vanodine COSHH Risk Assessment Portal.

Accessing the COSHH Risk Assessment Portal Registering for a new account.

To begin using the portal, you will first need to register for an account.

- 1 Follow the link given to you by your account manager, which will take you to the login screen shown here.
- 2 Click the Register button.

PLEASE NOTE
If you are experiencing difficulties accessing the portal or have not been given authorisation, please contact your account manager.

Welcome to the Evans Vanodine COSHH Risk Assessment Portal.

Accessing the COSHH Risk Assessment Portal

Registering for a new account continued.

A pop-up screen will appear. Complete all the blank fields, ie First Name, Last Name, Email Address Telephone number, Name of Your Distributor, Distributor Postcode, Distributor Region, Password and Password Conformation.

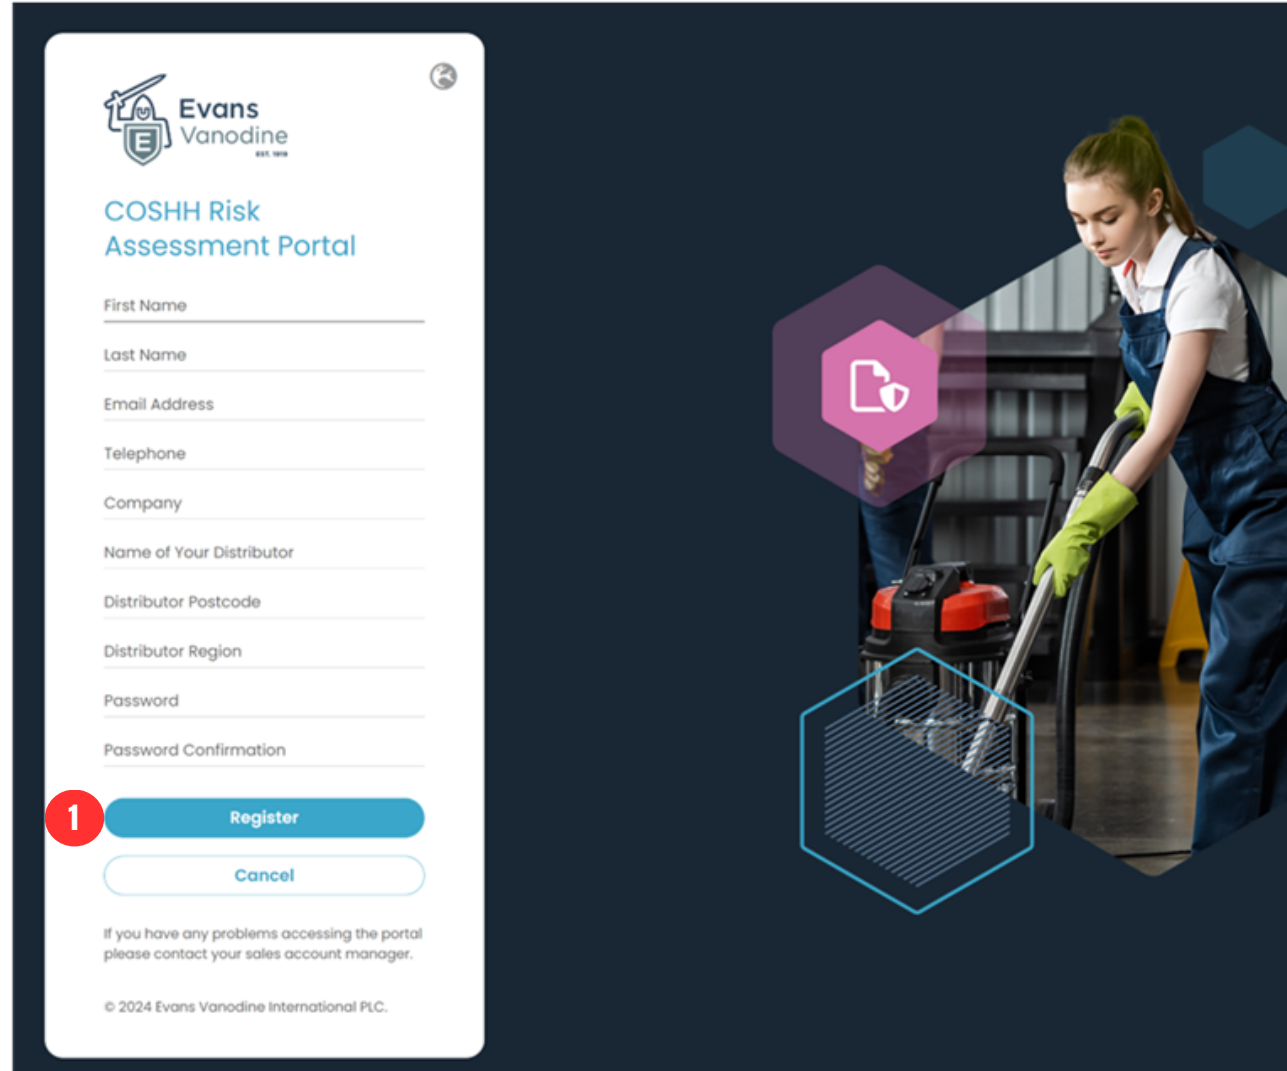

1 Click the Register button.

Your details will now be sent to the Evans Vanodine Portal Administrator, who will then authorise your account. This may take up to 48 hours, so please be patient and check your spam/junk folders.

PLEASE NOTE

If you are experiencing difficulties accessing the portal or have not been granted authorisation, please contact your account manager.

Welcome to the Evans Vanodine COSHH Risk Assessment Portal.

The Dashboard Screen (My Account Settings)

Logo and Personal Details.

- 1 Your Personal Details fields, including Password can be updated at anytime.
- 2 Adding your Company Logo will personalise all downloadable content of your completed COSHH Assessment Reports. To add your own logo please click the Choose file button.
- 3 Once you have added your logo it will show here.

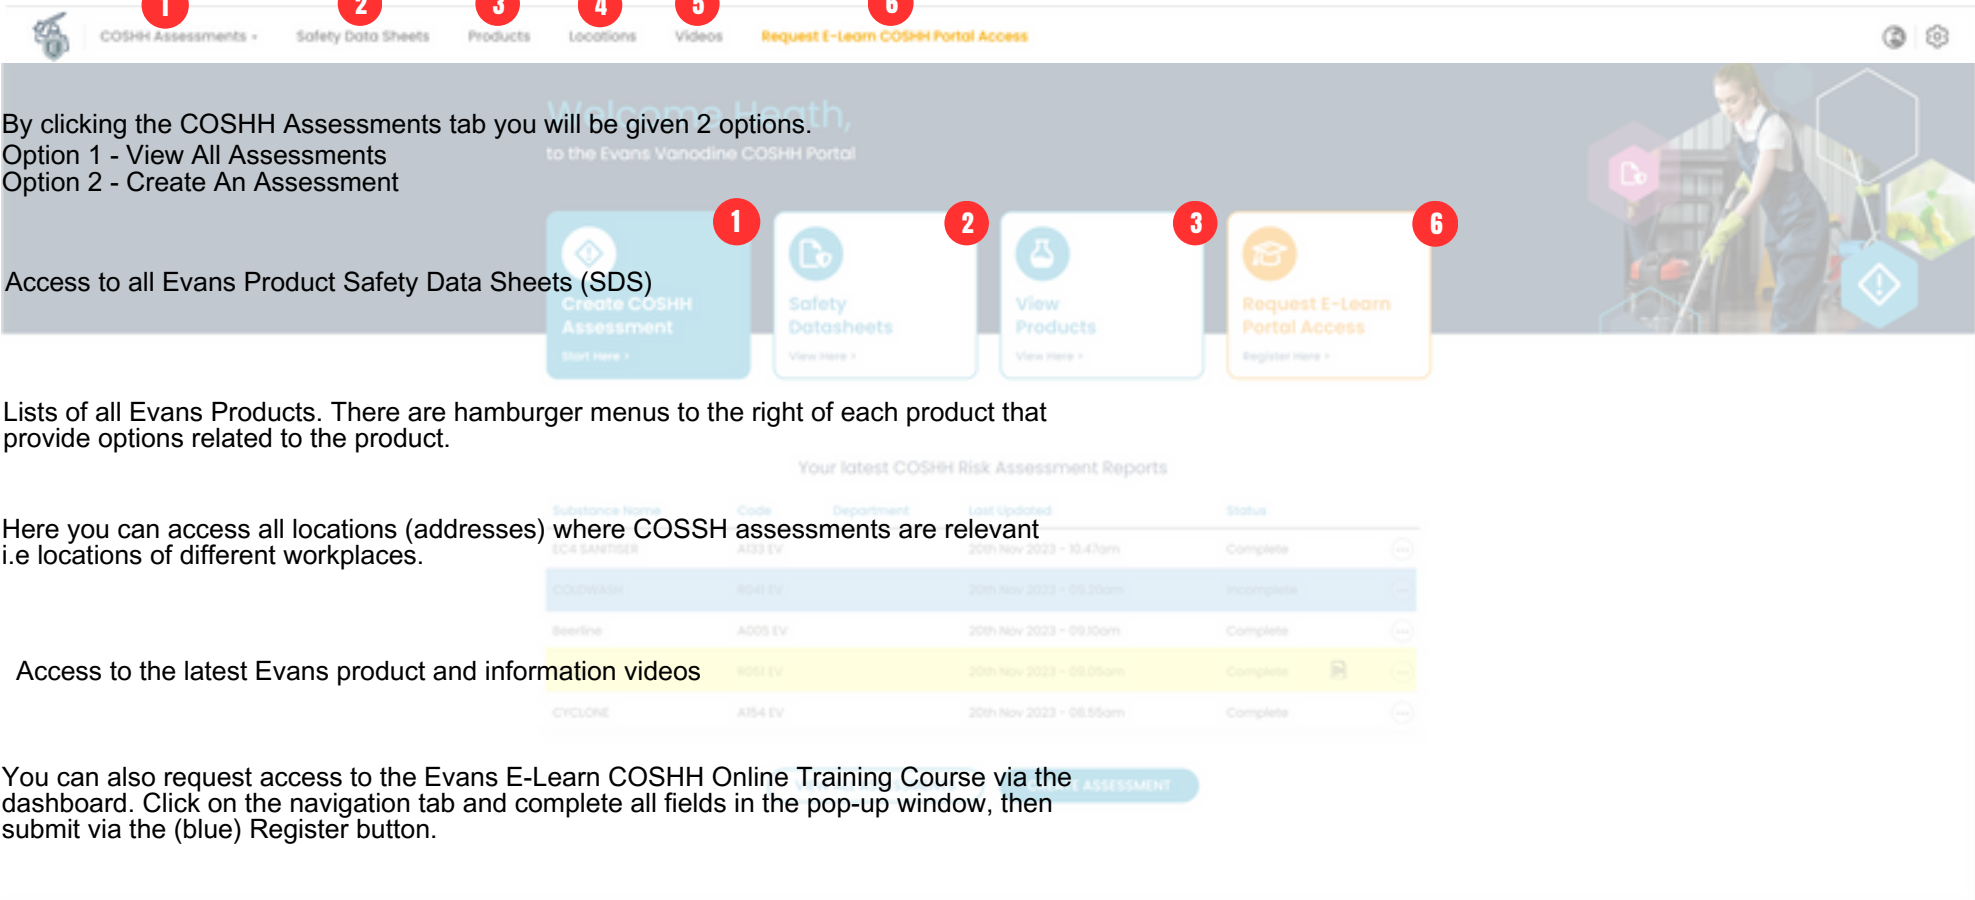

The screenshot shows the 'Edit Your Account' page. The 'Personal Details' section is highlighted with a red box and a red circle '1'. It contains fields for First Name (Joe), Last Name (Bloggs), Email (customer@blazeetcleaning), Telephone (01712 123456), Mobile (07925 123456), Company (Meticulous Cleaners), and Position (Manager). The 'Company Details' section shows a logo upload area with a red circle '3' over the logo and a red circle '2' over the 'Choose file' button. A red circle '4' is over the 'UPDATE' button in the top right corner.

- 4 Once you have made any changes to your account settings, you must click the UPDATE button in the top right for changes to take effect.

Welcome to the Evans Vanodine COSHH Risk Assessment Portal.

The Dashboard Screen (Navigation bar)

Next we will walk you through the top navigation bar, these quick links can be accessed by clicking on the appropriate navigation tabs and accessed throughout the portal at anytime.

The dashboard features a top navigation bar with the following tabs: COSHH Assessments, Safety Data Sheets, Products, Locations, Videos, and Request E-Learn COSHH Portal Access. Below the navigation bar is a main content area with a welcome message and four primary action buttons: Create COSHH Assessment, Safety Datasheets, View Products, and Request E-Learn Portal Access. A table titled 'Your latest COSHH Risk Assessment Reports' is displayed below the buttons, showing details for various assessments.

1 By clicking the COSHH Assessments tab you will be given 2 options.
Option 1 - View All Assessments
Option 2 - Create An Assessment

2 Access to all Evans Product Safety Data Sheets (SDS)

3 Lists of all Evans Products. There are hamburger menus to the right of each product that provide options related to the product.

4 Here you can access all locations (addresses) where COSHH assessments are relevant i.e locations of different workplaces.

5 Access to the latest Evans product and information videos

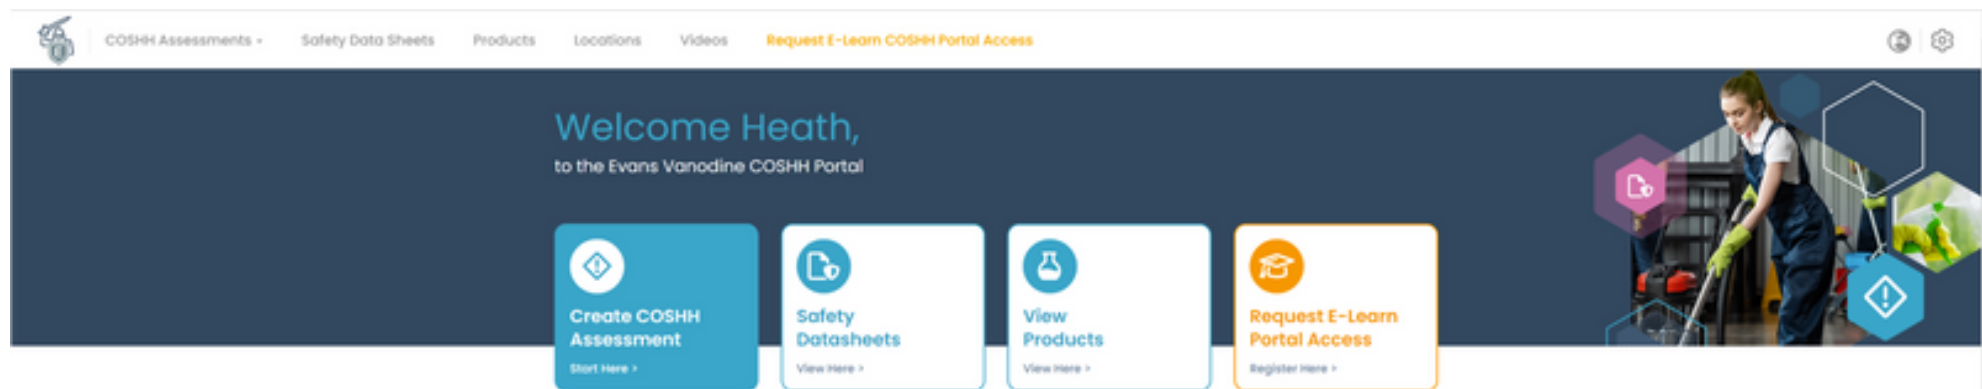

6 You can also request access to the Evans E-Learn COSHH Online Training Course via the dashboard. Click on the navigation tab and complete all fields in the pop-up window, then submit via the (blue) Register button.

Welcome to the Evans Vanodine COSHH Risk Assessment Portal.

The Dashboard Screen (Creating a COSHH Assessment Reports)

There are a number of ways you can start to create an assessment. Below are just some of the short cuts to allow easy access.

1 To begin creating your COSHH report click the COSHH Assessment button located in the top menu bar.

2 Alternatively, a blue dashboard tile can be used to create a COSHH Assessment Report

3 There is also a CREATE ASSESSMENT button (blue) located under the list of latest COSHH risk assessment reports..

The screenshot shows the dashboard interface with the following elements:

- 1** Top navigation bar: COSHH Assessments, Safety Data Sheets, Products, Locations, Videos, Request E-Learn COSHH Portal Access.
- 2** Dashboard tiles: Create COSHH Assessment (blue), Safety Datasheets, View Products, Request E-Learn Portal Access.
- 3** Table of latest COSHH Risk Assessment Reports with a 'CREATE ASSESSMENT' button below it.

Substance Name	Code	Department	Last Updated	Status

Welcome to the Evans Vanodine COSHH Risk Assessment Portal.

Creating a COSHH Assessment Reports

The first section displayed when creating a COSHH assessment report is general information about your business, supplier, product and usage.

The portal will pre-populate some of the information required but you will need to complete the rest.

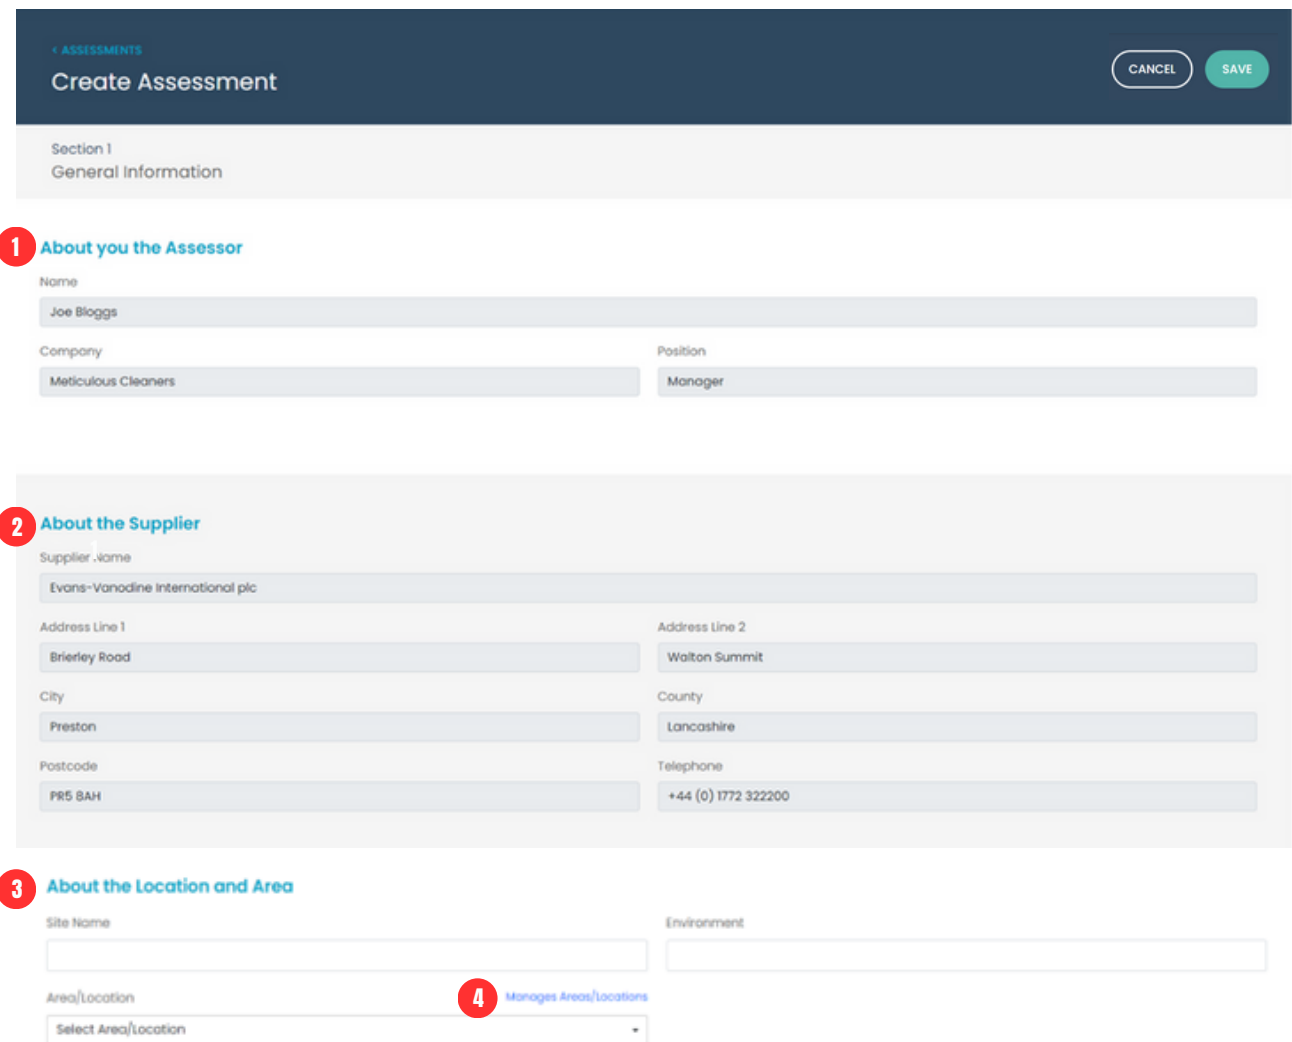

Please note: The assessment can be saved at anytime by clicking the save button in the top right hand corner of the screen.

1 The About you, the Assessor section should be pre-populated with the correct information.

2 The About the Supplier section should be pre-populated with the correct information.

3 Choose the location and area in which the Evans Vanodine product will be used.

4 **Please note:** Locations can also be found in the top navigation bar. Here you can edit and add as many locations as you require. This information can be accessed by clicking the Manage Area/Locations link, this will allow you to choose from a list of locations.

Welcome to the Evans Vanodine COSHH Risk Assessment Portal.

Creating a COSHH Assessment Reports

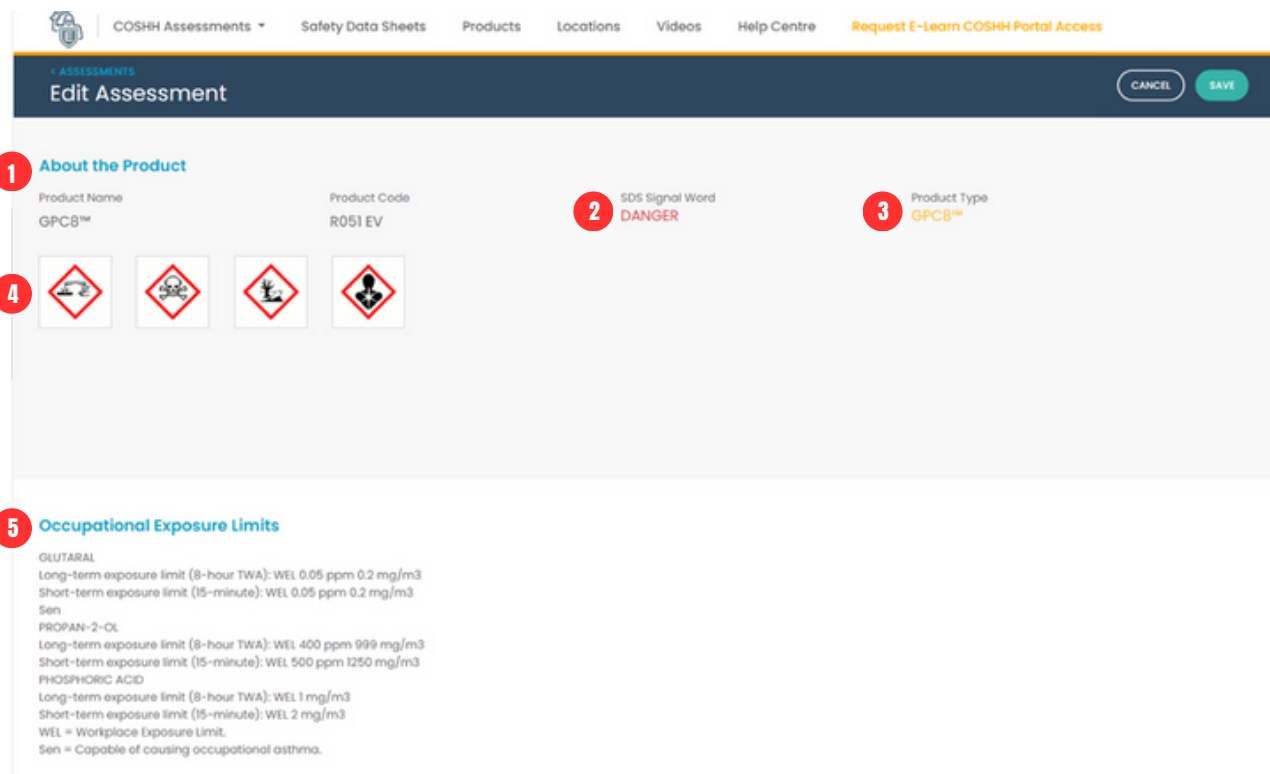

1 Select the Evans product for which you wish to create a COSHH assessment report. You can do this by either entering the product name into the box provided or using the dropdown box to choose your specific product.

2 The relevant signal word will be pre-populated based on the product

3 The relevant ProductType will pre-populated on selection of Evans Product.

4 The relevant Hazard Pictograms will pre-populated on selection of the Evans Product.

5 Dependent on the product you choose, this field will pre-populate any Occupational Exposure Limits.
Please note: *If the product doesn't contain any Occupational Exposure Limits this section will be left blank.*

The screenshot displays the 'Edit Assessment' interface. At the top, there is a navigation bar with links for 'COSHH Assessments', 'Safety Data Sheets', 'Products', 'Locations', 'Videos', 'Help Centre', and 'Request E-Learn COSHH Portal Access'. Below the navigation bar, the page title is 'Edit Assessment' with 'ASSESSMENTS' and 'Edit Assessment' text. The main content area is divided into sections:

- 1 About the Product:** Includes 'Product Name' (GPCB™) and 'Product Code' (R051 EV).
- 2 SDS Signal Word:** Pre-populated with 'DANGER'.
- 3 Product Type:** Pre-populated with 'GPCB™'.
- 4 Hazard Pictograms:** Four hazard pictograms are displayed in a row.
- 5 Occupational Exposure Limits:** Lists exposure limits for three substances: GLUTARAL, PROPAN-2-OL, and PHOSPHORIC ACID. Each substance has long-term and short-term exposure limits (WEL) listed.

Welcome to the Evans Vanodine COSHH Risk Assessment Portal.

Creating a COSHH Assessment Reports

The section requires information related to the task, frequency, quantity and method of use and who may be harmed.

1

Please enter by typing in the box provided specific details of how you are using the Evans Vanodine product.

2

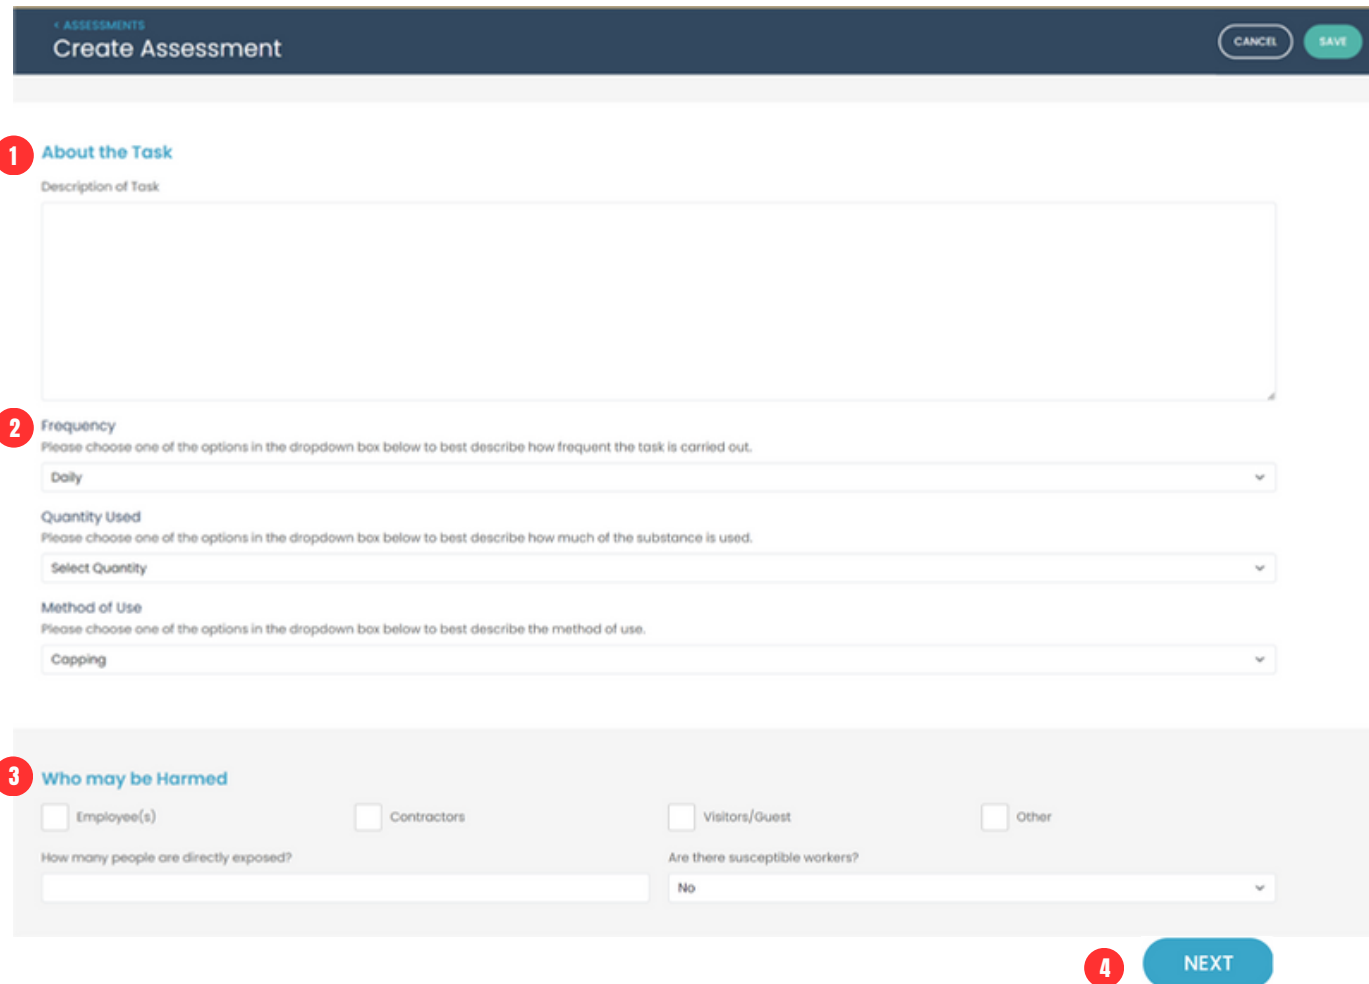

Please choose one of the options from the dropdown boxes to best describe how often you carry out the task, the quantity used in the task and the method of use.

3

The report also requires information of who may be at risk from the use of the product.

4

Once you have completed this section please proceed to the next page by clicking the next button.

Creating a COSHH Assessment Reports Section 2 - Hazard Score (Respiratory)

The scores in section 2 show the hazards associated with the given product.

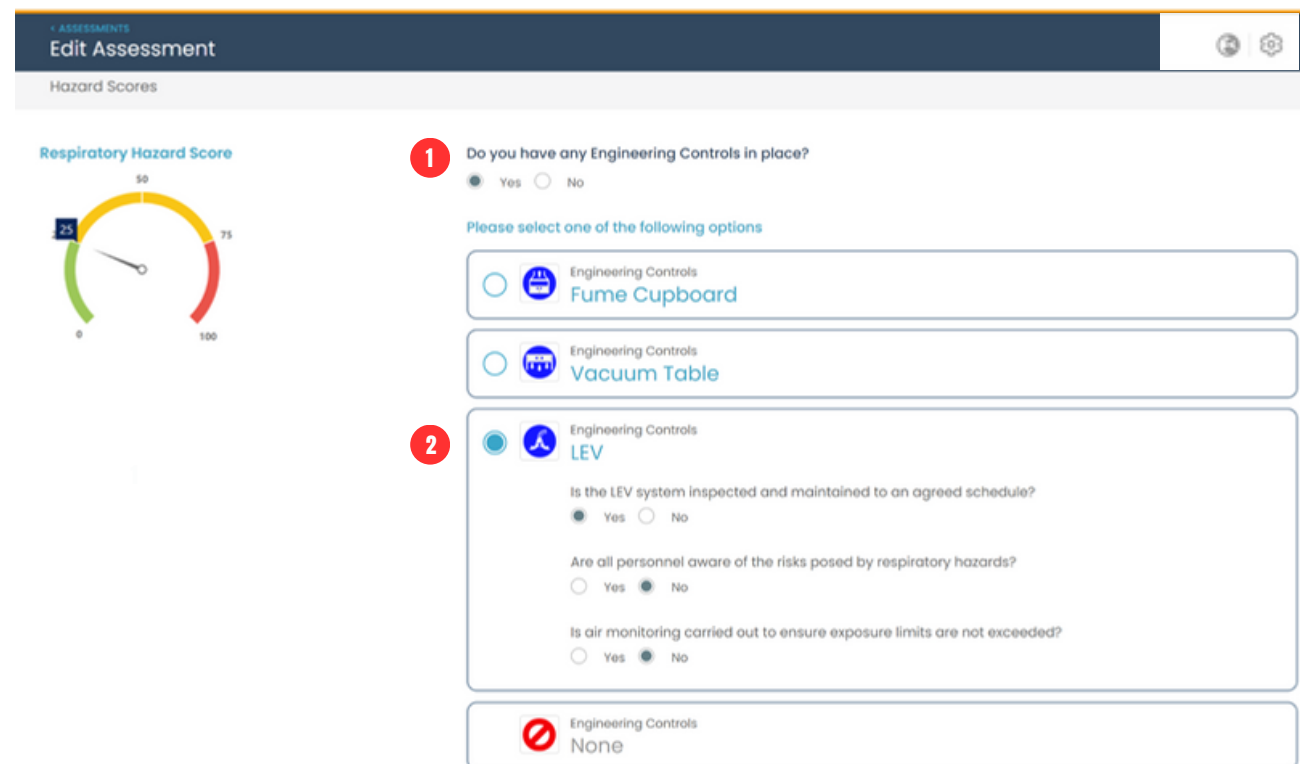

Please note: If the product is not a respiratory hazard this section will be skipped.

In order to reduce the risk of the hazard causing harm, control measure must be implemented so as to reduce the risk of those hazards causing harm to ALARP.

1 To complete the Respiratory Hazard Score, answer the questions in sequence, selecting the options that are correct for your use.

2 You will be provided with a question set dependant on your choices. Please answer each question honestly. Based on your answers the risk wheel will either stay the same or reduce the risk if additional measures are added.

3 Once you have completed this section please proceed to the next page by clicking the next button.

- 1 After you have clicked the SAVE & FINISH button on the previous slide your assessment you created will now show the latest assessments in your dashboard.
- 2 By clicking on the 3 dot icon additional options will be displayed
- 3 Now click on the View Report link

The screenshot shows the dashboard interface. At the top, there is a navigation bar with links for COSHH Assessments, Safety Data Sheets, Products, Locations, Videos, and a link to Request E-Learn COSHH Portal Access. Below the navigation bar, there is a search bar and a 'CREATE ASSESSMENT' button. A notification banner at the top states 'Your assessment has been saved.' Below this is a table of assessments with columns for Substance Name (Code), Department, Last Updated, Respiratory, Eyes/Face, Skin, Ingestion, and Status. The first row is highlighted in light blue and has a dropdown menu open, showing options: Edit, View Report, Show Considerations, and Delete. Red callout boxes 1, 2, and 3 point to the first row, the dropdown menu, and the 'View Report' option respectively.

Substance Name (Code)	Department	Last Updated	Respiratory	Eyes/Face	Skin	Ingestion	Status

Your report summary will appear on screen. You can save as a PDF by clicking the download button. Please [click here](#) for an example COSHH Assessment Report.

The screenshot displays the 'Your Risk Assessment Report' interface. On the left, there are three risk score gauges: Respiratory Risk Score (90), Eyes and Face Risk Score (90), and Skin Risk Score (90). The right side shows 'Scenario Details' including Task Description, Site Name, Area/Location, Frequency, Method, Who May Be Harmed?, and Susceptible Workers. A 'Download' button is highlighted with a red circle and the number '1'. A modal window titled 'Your Risk Assessment Report' is overlaid, showing a preview of the report and a 'Download' button also marked with a red circle and the number '1'.
