

Alkaline foam cleaner

Heavy-duty, alkaline detergent formulated for use in the food process industry by foam, immersion or manual cleaning.

Effective removal of food soil in meat processing factories and slaughterhouses.

Suitable for use in high pressure water and compressed air systems.

- Can be used in hot or cold water.
- Suitable for use in all water conditions.
- Fast and effective removal of fat and grease.

FOAM APPLICATION:

Target™ should be used at a concentration of 3-6% v/v (30-60 ml per litre) at temperatures from ambient to 60°C through a pressure wash system fitted with a suitable foam lance.

When applied through a pressurised canister applicator the concentration may be reduced to 2-5% v/v (20-50 ml per litre) at ambient temperature. The foam should remain in contact with the surface for 5-15 minutes before being rinsed to drain at high pressure, with preferably hot (60-70°C) potable water.

MANUAL APPLICATION:

Target™ may be applied by brush or abrasive pad at concentrations in the range 1-2% v/v (10-20 ml per litre) at 40-50°C. Surfaces should be rinsed thoroughly, with potable water.

IMMERSION:

Target™ should be used at 1-5% v/v (10-50 ml per litre) at 50-80°C followed by a thorough rinse in potable water.

Target™ is suitable for use in animal and poultry housing, abattoirs, poultry and meat processors, and in general food processing applications. For further information on safe use and handling please contact your Evans Vanodine representative.

25 L

Order Code: A039KEV

Pack: 25 litre

PRODUCT INFORMATION:

Appearance:	Clear pale straw liquid
Odour:	Characteristic
pH - undiluted:	13.45
Shelf life:	3 years

QUALITY AND ENVIRONMENTAL ASSURANCE:

This product is manufactured in the U.K. by EVANS VANODINE INTERNATIONAL PLC under an ISO 9001 Quality Management System Cert. No. FM 09535 and an ISO 14001 Environmental Management System Cert. No. EMS 506072 registered by the British Standards Institution.

REVISION DATE: 01/07/16
