Commitment to achieving Net Zero

Evans Vanodine International PLC is committed to achieving Net Zero emissions by 2050.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	354.4
Scope 2	234.7
Scope 3 (Included Sources)	750.5 Waste, water, travel, paper use, courier, transmission and distribution losses.
Total Emissions	1339.6

Current Emissions Reporting

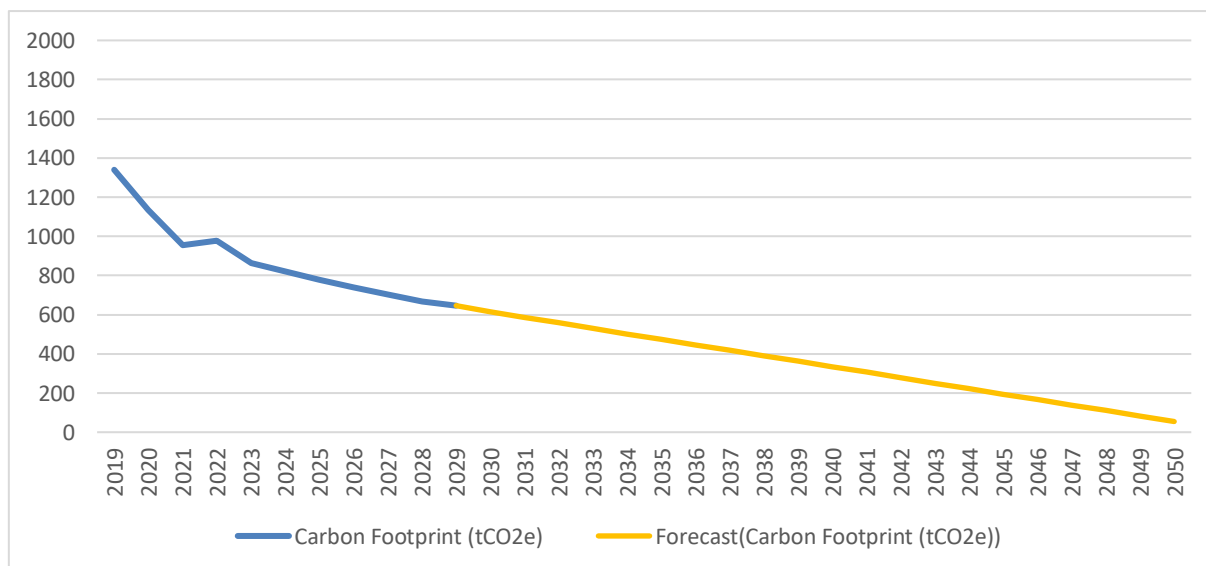

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	189.0
Scope 2	61.7
Scope 3 (Included Sources)	542.8 Waste, water, business travel, paper, courier – freight, transmission and distribution losses.
Total Emissions	793.6

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 646 tCO₂e by 2029. This is a reduction of 25%.

Projected progress against these targets can be seen in the graph below:

Carbon Reduction Projects

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emission reduction achieved by these schemes equate to 546 tCO₂e, a 40% reduction against the 2019 baseline.

- Offices upgraded to include HVAC systems for heating and cooling, LED lighting on motion sensors and full double glazing throughout.
- LED lighting has been installed in 2 of the 4 factory areas.
- Air compressor systems have been addressed for leaks and continue to be monitored on a regular basis.
- Company cars have been swapped from petrol / diesel to plug in hybrid / full electric.
- Environmental Management is controlled under ISO14001 certificate number EMS506072.

In the future we hope to implement further measures such as:

- Complete installation of LED lighting systems for the other 2 units.
- Conduct studies on the production oven and make improvements.
- Optimism voltage on site.
- Investigate solar as a potential source of power.
- Campaign throughout the site for a switch off culture.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and a subset of Scope 3 emissions have been reported.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed on behalf of the Supplier:

Chris Evans
Managing Director, Evans Vanodine
