SUPER CONCENTRATE RANGE

Low Impact Cleaning and Hygiene

Using Evans Assured Range alongside our e:dose super concentrate range ensures all areas of the cleaning and hygiene schedule are covered, whilst also keeping your impact on the environment to a minimum. The Assured Range allows you to clean a variety of surfaces but, for areas where disinfection is required, e:dose provides effective and tested products to kill a range of bacteria, viruses and yeast.

Responsible and Sustainable Tourism

Using EU Ecolabel Assured products, along with e:dose and Evans range of dosing systems can help businesses meet criteria set by third-party accreditations within the hospitality industry, such as Green Key, Green Tourism and Green Globe.

“At least 75% of chemical cleaning products used for routine cleaning have a recognised eco-label.”

“Concentrated chemical cleaning products and safe dilution system are used for routine cleaning.”

The EU Ecolabel promotes certified products with a demonstrated reduced impact on the environment, throughout their entire life

cycle. It also guarantees compliance with new and forthcoming legislation on ecodesign, sustainability labelling and green claims, and allows users to contribute to a circular, climate neutral and clean economy.

A label you can trust.

e:dose

Using e:dose, versus conventional Evans Vanodine RTU products, equates to saving large volumes of single use plastic and cardboard packaging, leading to fewer deliveries and a reduction in vehicle emissions.

▼ 481 kg
Less plastic

▼ 661 kg
Less cardboard

▼ 28,824 kg
Less weight

▼ 30+
Fewer pallets

Comparison figures based on using equivalent Evans Vanodine RTU products for one year.
