

Four Seasons Masodip®

Ready-to-use chlorhexidine-based teat disinfectant

Ready-to-use teat disinfectant formulated with chlorhexidine gluconate. Effective against a wide range of common mastitis causing organisms in the presence of organic matter.

Contains 10% glycerol to help promote good teat condition.

Passes EN 1656. Rapidly kills bacteria. Effective against mastitis causing organisms.

- Tested in a UKAS Accredited Laboratory.
- Passes European disinfectant test method EN 1656.
- Ready-to-use especially suitable where measurement and mixing are likely to prove inconvenient.

No dilution required.

POST-MILKING DIPPING:

Fill teat cup about two thirds full with Four Seasons Masodip®. Dip teats of every cow immediately after each has been milked, making sure that the full length of the teat is immersed. Top up with fresh solution as required. Empty and wash out cups after milking.

POST-MILKING SPRAYING:

Immediately after milking, spray the entire surface of each teat of every cow with Four Seasons Masodip®.
