## 0.535% w/v ready-to-use teat dip and teat spray solution

Ready-to-use iodophor formulation which contains 9% w/v Glycerol & 1% w/v Sorbitol to help keep teats soft & supple all year round.

UK Authorised Veterinary Medicine.

Formulated to help reduce bacterial contamination that causes mastitis in dairy herds.

- Reduces the risk of infection by leaving an antiseptic film of Iodine adhering to teats which have been treated by dipping or spraying. For full activity, allow cows to stand for 20 minutes after dipping.
- Contains 10% emollients to help maintain good teat condition.
- Ready-to-use, especially suitable for situations where measurement & mixing are likely to prove inconvenient.

### No dilution required.

#### TEAT DIPPING:

Fill teat cup about two thirds full with the product. Dip teats of every cow immediately after each has been milked, making sure that the full length of the teat is immersed. Top up with fresh solution as required. Empty and wash out cups after milking.

#### TEAT SPRAYING:

Immediately after milking, spray the entire surface of each teat of every cow with the product.

#### UDDER WASHING & CLUSTER DIPPING:

Dilute in the proportion 1 part to 80 parts of clean water (125 ml per 10 litres or 2 fl oz per gal). To help prevent cross infection, individual cloths or disposable paper towels are strongly recommended. Dry teats before milking. Immerse clusters and agitate for at least half a minute. Rinse in clean water before use.
