

Masomint™

Ready-to-use teat disinfectant with mint fragrance

Ready-to-use. Chlorhexidine gluconate and lactic acid-based teat disinfectant and conditioner with a fresh mint fragrance.

Effective against a range of mastitis causing organisms and bacteria. Passes EN 1656.

Contains L-menthol proven to have a soothing and calming effect on the skin.

- Highly-visible, long-lasting, dark blue colour helping to identify which cows teats have been dipped.
- Can be used as a dip, foam or spray.
- High levels of glycerol which softens the skin to reduce cracks and crevices where bacteria can multiply.
- Suitable for use in robotic milking plants.
- Specially selected mild surfactant.

No dilution required.

Ensure udder and teats are clean and dry before using this product.

POST-MILKING DIPPING:

Fill teat cup approximately two-thirds full with the Masomint™.

Dip teats of every cow immediately after each has been milked, making sure that the full length of the teat is immersed.

Top up with fresh solution as required.

Empty and wash out cups after milking.

POST-MILKING SPRAYING:

Immediately after milking, spray the entire surface of each teat of every cow with Masomint™.

POST-MILKING FOAM DIPPING:

Fill foaming teat dip cup approximately two-thirds full with Masomint™.

Squeeze cup to generate the foam.

Dip teats of every cow immediately after each has been milked, making sure that the full length of the teat is immersed.

Top up with fresh solution as required.

Empty and wash out cups after milking.
