

Masocare[®] Concentrate

2.72% w/v concentrate for teat dip and teat spray solution

Fast acting iodophor formulation which contains a high concentration of emollients to help prevent and heal chaps and sores.

UK Authorised Veterinary Medicine.

Formulated to help reduce bacterial contamination that causes mastitis in dairy herds.

- Reduces the risk of infection by leaving an antiseptic film of Iodine adhering to teats which have been treated by dipping or spraying.
- Contains high levels of Glycerol and Sorbitol to help in the healing of cracks and sores and to keep skin soft and supple all year round.
- Effective aid in the control of mastitis.

TEAT DIP OR SPRAY (5,000 ppm minimum available Iodine):

Prepare a fresh solution daily by adding one part product to four parts clean water and mix well.

TEAT DIPPING:

Fill teat dipping cup about two thirds full with the prepared solution and dip the teats of every cow immediately after milking, ensuring the full length of the teat is covered.

Top up cup with fresh solution as required. Teat dip cups should be emptied and washed after milking.

TEAT SPRAYING:

Immediately after milking spray entire surface of each teat of every cow with the prepared solution.

UDDER WASH AND CLUSTER DIP (60 ppm minimum available Iodine):

Dilute one part product with 400 parts water (25 ml per 10 litres or 0.4 fl oz per gal).

To prevent cross infection, individual cloths or disposable paper towels are strongly recommended. Immerse clusters and agitate for at least half a minute. Rinse in clean water before use. Wash and dry udders and teats before milking.
