INTRODUCTION

SETTING THE STANDARD

Evans Vanodine has been manufacturing cleaning products for over 100 years, our expertise and industry knowledge offers affordable, user friendly solutions for all your needs.

Following a strict hygiene cleaning program and providing on-going training to employees ensures all your cleaning needs are consistently met.

This brochure aims to support you in selecting the correct products to be used in conjunction with the latest NHS Cleaning Manual and National Standards of Healthcare Cleanliness. In addition Evans have produced a Healthcare Cleaning Manual which provides correct procedure and best practice for product use to meet the required standards.

OUR CERTIFICATIONS

Evans Vanodine have utilised their experienced quality control and research and development laboratories and **UKAS** (United Kingdom Accreditation Service) accredited microbiological laboratory to formulate and test a range of products to meet all the requirements of the healthcare industry. Evans Vanodine is also an **ISO 9001** and **ISO 14001** registered company.

Evans have also received certification from the Halal Certified Association (HCA) UK for a selection of products including Est-eem, Trigon, Trigon Plus and Handsan certificates can be downloaded direct from our website.

Microbiology tests have been undertaken on all Evans Vanodine products which have bactericidal properties; a summary of these are available in the form of a microbiological profile which is available upon request.

We can confirm that the use of products from the Evans hand-wash range is consistent with the aims of veganism as defined by The Vegan society.

CHOOSING THE RIGHT PRODUCT

Cleaning is a vital part of the overall prevention and control process which aims to provide a clinically clean and safe environment for delivering patient care. Areas that are not cleaned properly could aid the transfer of harmful organisms in a healthcare environment, potentially causing infection.

In an area where hygiene is important, and with strict guidelines in place, it is vital that the cleaning products you use meet all the necessary standards. Choosing the right product involves careful consideration of the type of product used for certain tasks and the impact on the environment. Evans Vanodine understand these requirements and have produced this guide, along with a Training Support DVD, wallcharts and literature, to help eliminate guess work, ensuring you choose a product fit for purpose and avoid wasted time and money.

LOW IMPACT ON THE ENVIRONMENT

Evans Vanodine has a unique system for identifying which products have a low impact on the environment, called Evans GreenTick. The products in this brochure which achieve this certification are marked with a green tick. For further details please visit www.evansgreentick.com.

HELP AND ASSISTANCE

This guide is one in a series which has been produced to help users of Evans Vanodine products attain the best possible results. We realise there are various situations and circumstances that determine which products are the most suitable and we hope this guide is of benefit to you and helps you to choose the correct product and dispensing system. If you require any further assistance please contact your local Evans distributor or our sales department.

HAND HYGIENE

VEGAN STATEMENT

The use of products from the Evans Vanodine hand-wash range is consistent with the aims of veganism as defined by The Vegan Society. "Veganism is a way of living which seeks to exclude, as far as possible and practicable, all forms of exploitation of, and cruelty to, animals for food, clothing or any other purpose."

The products are formulated and regulated in accordance with the Cosmetic Products Regulation 123/2003 which forbids the placing on the market of finished cosmetic formulations that have been tested on animals, or cosmetic products containing ingredients that have been tested on animals, to establish product safety, after the cut-off date of March 2009.

TRIGON® PLUS

Bactericidal hand wash

- Passes **EN 1499** and **EN 13727**.
- Passes **EN 1276**; proven to kill 99.999% of bacteria. Reduces cross contamination.
- 1 L cartridge produces 500 shots of liquid soap.
- Low impact on the environment.

[Product Information Sheet - How To Use Microbiological Profile](#)

TRIGON® FOAM PLUS

Bactericidal foaming hand wash

- Unperfumed, foaming hand wash use in conjunction with an Evans Evolve Dispenser.
- Passes **EN 1499** and **EN 13727**.
- Passes **EN 1276**; proven to kill 99.999% of bacteria. Reduces cross contamination.
- 1 L cartridge produces 500 shots of liquid soap.

[Product Information Sheet - How To Use Microbiological Profile](#)

HANDSAN™

70% Alcohol-based hand disinfectant

- **Effective against Coronavirus and Strep A.**
- BPR approval: UK-2019-1195-0001
- With added moisturiser.
- 1 L cartridge produces 500 shots of liquid soap.

WHY IS HAND WASHING IMPORTANT?

Hand washing is one of the most important steps in reducing the risk of cross contamination in a healthcare environment.

Good hand hygiene helps to stop organisms from being transferred from one patient to another and can reduce the spread of infection.

Training is vitally important especially HOW? WHEN? and WHY? because by not washing hands when they should be, not washing them in the correct way or not drying them thoroughly can also mean there is still a risk of contamination.

Not washing hands correctly can also impact the economy, when people become ill and subsequently have to take time off work or children are unable to attend school. It also puts tremendous pressure on Doctors' surgeries and the National Health Service due to ill health.

HAND HYGIENE BOARDS

FOR USE IN CRITICAL, NON-CRITICAL AND GENERAL INDUSTRY AREAS:

Hospitals, surgeries, care homes, schools, catering areas, reception areas.

CRITICAL CONTROL POINT

When working in a healthcare environment there are three important questions about hand hygiene:

HANDWASHING: WHEN? WITH WHAT? HOW?

When should I clean my hands during work?

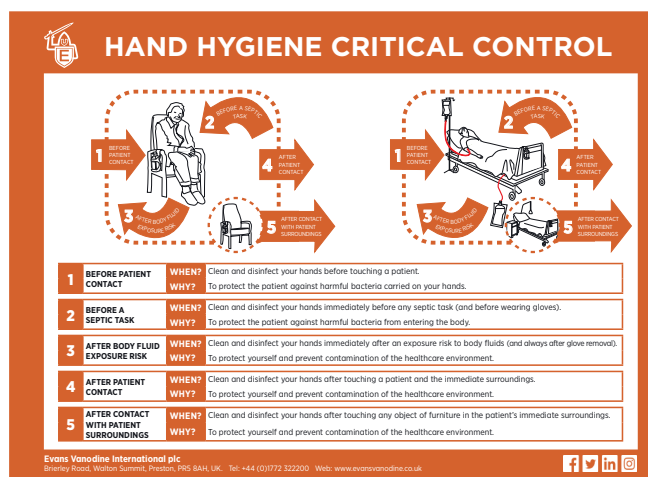

The five moments approach for hand hygiene defines the key moments when healthcare workers should perform hand hygiene. The approach was developed by the World Health Organisation (WHO) and is used by the national cleanyourhands campaign to help everyone working in healthcare to decide when to clean their hands. The five moments are: before touching a patient, before clean/aseptic procedures, after body fluid exposure/risk, after touching a patient and after touching patients surroundings.

What should I use to clean my hands and how should I use it?

There are two things you can use to clean your hands: washing with soap and water, or you can use alcohol hand rub. Both are acceptable ways to clean your hands. It is important to make sure your hands are cleaned thoroughly to ensure acceptable decontamination is achieved.

How should I wash my hands?

See the technique diagrams below for how to do this:

[SANITISE YOUR HANDS](#)

SURFACE DISINFECTION

FREQUENT TOUCH POINTS

As well as the cleaning and disinfection of surfaces, special attention must be paid to frequent touch points in patient care and procedural areas.

- Door handles
- Door push plates
- Call bells
- Light switches
- Cot sides
- Metal bed frames
- Television controls
- Bedside tables
- Lift buttons

or any item or area that is frequently used and touched.

SAFE ZONE™ PLUS

Virucidal disinfectant

5l 750ml

- Proven multi-surface, disinfectant cleaner.
- **Passes EN 14476; effective against Coronavirus.**
- Kills enveloped and non-enveloped viruses.
- Kills bacteria, viruses and yeast.
- Ready to use formulation.
- Unperfumed, non-classified formulation.

[Product Information Sheet - How To Use Microbiological Profile](#)

EC4 SANITISER

Super concentrated cleaner sanitiser

5l 1l

- Multi-surface, bactericidal, virucidal and yeasticidal.
- **Passes EN 16777 and EN 14476 effective against Coronavirus.**
- Low-dosage; economical in use.
- Unperfumed; suitable in food areas.

[Product Information Sheet - How To Use Microbiological Profile](#)

EST-EEM™

Cleaner sanitiser

5l 750ml

- Multi-purpose, cleaner and terminal disinfectant.
- **Passes EN 1276, EN 16777, EN 14476, EN 16615 and EN 1650 effective against Coronavirus.**
- Unperfumed; suitable in food areas.
- Concentrate or ready-to-use spray.

[Product Info Sheet - How to Use Microbiological Profile](#)

PROTECT™

Disinfectant cleaner

5l 750ml

- Multi-purpose, detergent and disinfectant.
- **Effective against Coronavirus and Strep A.**
- **Passes EN 1276, EN 16777, EN 14476, EN 16615 and EN 1650.**
- Perfumed; clean, fresh fragrance.
- Concentrate or ready-to-use spray.

[Product Info Sheet - How To Use Microbiological Profile](#)

EC9 WASHROOM

Super concentrated disinfectant and descaler

5l 1l

- Multi-surface, bactericidal, virucidal and yeasticidal.
- **Passes EN 16777 and EN 14476 effective against Coronavirus.**
- Low-dosage; economical in use.
- Distinctive, long-lasting fragrance.

[Product Information Sheet - How To Use Microbiological Profile](#)

CYCLONE

Extra thick bleach

5l

- With added detergent.
- **Effective against Coronavirus at 1,000 ppm.**
- **Passes EN 1276 and EN 1650.**
- Highly perfumed.
- Suitable for soaking cloths/mops.

[Product Information Sheet - How To Use Microbiological Profile](#)

EVANS CHLOR TABS

Disinfection solution

650g

- Quick-dissolving chlorine tablet.
- **Effective against Coronavirus at 1,000 ppm.**
- Kills bacteria, viruses and yeast.
- **Passes EN 1276, EN 14476, EN 1650** see micro profile for further tests.
- Unperfumed; suitable for food areas and soaking cloths and mops.

[Product Information Sheet - How To Use Microbiological Profile](#)

KITCHEN / WARD PANTRY HYGIENE

EST-EEM™ Cleaner sanitiser

5L 750ml

- Multi-purpose unperfumed cleaner sanitiser.
- Removes general soiling and kills bacteria on all food contact surfaces.
- Passes **EN 16777** and **EN 14476** effective against **Coronavirus**.
- Passes **EN 1276** with a 30 second contact time.

[Product Information Sheet - How To Use Microbiological Profile](#)

EC4 SANITISER Super concentrated cleaner sanitiser

5L 1L

- Super concentrated unperfumed cleaner sanitiser.
- Passes **EN 16777** and **EN 14476** effective against **Coronavirus**.
- Low-dosage; economical in use.

[Product Information Sheet - How To Use Microbiological Profile](#)

LIFT™ Heavy duty cleaner degreaser

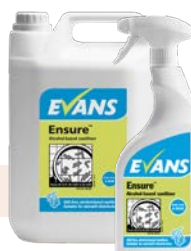

5L 750ml

- Multi-purpose cleaner and heavy-duty degreaser.
- Removes fat, grease, oil and ingrained soiling.
- Unperfumed and non-tainting.
- Ideal where food is handled, prepared or served.
- For use on all washable hard surfaces.
- Low impact on the environment.

[Product Information Sheet - How To Use](#)

ENSURE™ Alcohol-based sanitiser

5L 750ml

- Ready-to-use, unperfumed cleaner sanitiser.
- Alcohol-based; quickly evaporates, leaving the surface clean and disinfected.
- Does not contain quaternary ammonium compounds (QACs).
- Passes **EN 1276** with a 30 sec contact time.
- Also passes **EN 13697** and **EN 1650**.

[Product Information Sheet - How To Use Microbiological Profile](#)

GLAZE™ Dishwash tablets

120

- Outstanding cleaning performance.
- Removes foodstuffs, protein and grease deposits.
- Leaves crockery, cutlery and glassware sparkling clean and streak free.
- Built in detergent, glass protection, rinse aid and salt action; effective in all water conditions.
- Individually wrapped in soluble wrappers.

[Product Information Sheet - How To Use](#)

Q'DET™ Unperfumed liquid detergent

5L 1L

- Superior washing up liquid.
- Easily removes soil and grease.
- Contains foam boosters to provide a rich, long lasting foam.
- For manual cleaning of crockery, glassware and kitchen utensils.

[Product Information Sheet - How To Use](#)

WHY IS CLEANLINESS IMPORTANT?

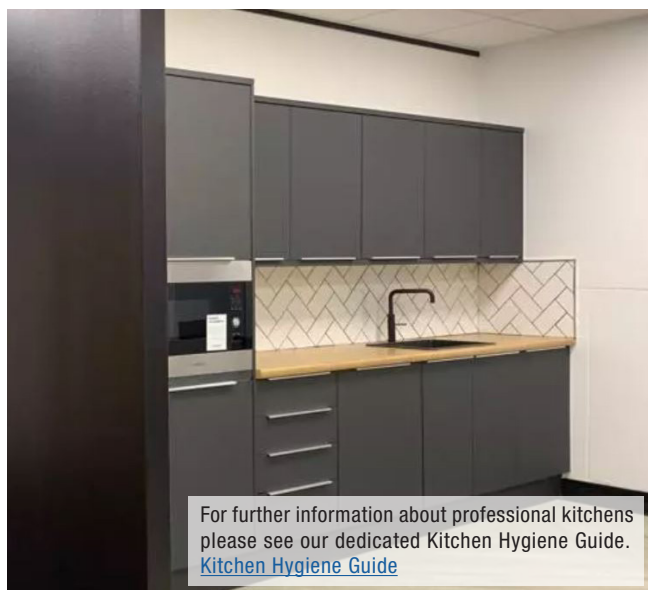

Stringent cleaning schedules and procedures must be implemented to help eliminate any risk of cross contamination and food poisoning. All surfaces and equipment must be cleaned and sanitised according to your cleaning schedule ensuring no stages are missed. Cleanliness is important to protect everyone.

KITCHEN STANDARDS - NHS GUIDELINES

These standards place responsibility on anyone using shared facilities to take all necessary measures to ensure the safety and cleanliness of a kitchen and/or ward pantry. (please see information from NHS guidelines manual). Wherever food or drinks are prepared, the highest standards of cleanliness and hygiene are essential.

In areas where hygiene is important, and with strict guidelines in place, it is vital that the cleaning products you use will meet all the necessary standards. Choosing the right product involves careful consideration of the type of product used for certain tasks and the impact on the environment.

Make sure the cleaning products you use pass the relevant EN test standards, be aware that any shared use patient crockery and cutlery must be cleaned using very high temperature water, a mechanical dishwasher is recommended for this process.

For further information about professional kitchens please see our dedicated Kitchen Hygiene Guide. [Kitchen Hygiene Guide](#)

ECO CONCENTRATE DOSING SYSTEM

EC2 DEGREASER

Super concentrated cleaner degreaser

5l 1l

- Multi-purpose, unperfumed cleaner degreaser.
- Neutral pH; safe to use on aluminium.
- Low-dosage; economical in use.
- Easily removes ingrained soil and heavy grease from a variety of hard surfaces.

SINK & DRAIN CLEAR

Sink and shower waste unblocker

2.5l

- Powerful liquid to clear and maintain sink and shower drains.
- Formulated to work quickly and efficiently to keep drains free flowing.
- Maintains drains to reduce build-ups and blockages, avoiding expensive call-out charges.
- Helps to overcome and control malodours.

[Product Information Sheet - How To Use](#)

SHOWERHEAD CARE

Single product procedure for descaling and disinfecting showerheads:

TO CLEAN SHOWERHEADS:

Dismantle the showerhead and place in a solution of 2 x 10ml caps **EC9** to 5 litres of warm water. Leave to soak for 30 minutes. Agitation with a nylon scrubbing brush may be necessary to remove heavy soil and limescale.

DISINFECTION OF SHOWERHEADS:

To kill a range of bacteria including **Legionella pneumophila**: Soak in a solution of **EC9** at a dilution rate of 1:60 warm water for a minimum of 5 minutes. This procedure should be carried out every 3 months.

TOILET CLEANING

EVERFRESH™

Apple / pot pourri neutral toilet cleaners

5l 1l

- For daily cleaning of toilets, urinals and floors.
- Neutral pH.
- Suitable for use on a variety of washable hard surfaces.
- Apple or pot pourri perfume.
- Pot pourri has a low-impact on the environment.

[Product Information Sheet - How To Use](#)

E-PHOS™

Phosphoric acid toilet cleaner and disinfectant

5l 1l

- Thickened multi-purpose, acidic cleaner.
- Removes limescale, body fat and general soil.
- Clings to surfaces for better cleaning action.
- Suitable for cleaning porcelain, stainless steel, sanitary ware, showers and tiled surfaces.

- Use on glass, paintwork, laminate, veneer, plastic and all hard floor surfaces.

[Product Information Sheet - How To Use](#)

LOW FOAM LIGHT

Neutral multi-surface cleaner

5L

- Low foaming neutral cleaner for use in combination scrubber dryer floor machines.
- Unperfumed.
- Removes soiling with one pass of the machine.
- Can also be used for general mopping of lightly soiled floors.

[Product Information Sheet - How To Use](#)

LOW FOAM HEAVY

Alkaline multi-surface cleaner

5L

- Low foaming alkaline cleaner for use in combination scrubber dryer floor machines.
- Removes heavy soiling with one pass of the machine.
- Unperfumed.
- Recommended for general mopping of badly soiled surfaces.

[Product Information Sheet - How To Use](#)

FLOORS ARE IMPORTANT

A large proportion of dirt entering a building is carried on footwear and if the floors are not correctly cleaned and maintained can suffer damage and potentially create a pathway for cross contamination to occur.

Floors should be cleaned last, with adequate signage placed while the floors are cleaned and left to dry to help prevent slips, trips and falls.

Large and flat surfaces should be cleaned using "S" shape motion, starting at the point furthest away from the door, then overlapping slightly but without going back over the area to avoid recontamination.

For further information about floorcare please see our dedicated Floor and Carpet Care Brochure.

[Floor and Carpet Care Guide](#)

EXTRACT PRO

Carpet and Upholstery Shampoo

5L

- For use with hot water extraction machines.
- Efficiently removes dirt and stains.
- Provides anti-soiling protection.
- Will maintain and enhance stain resistance.
- Suitable for pre-spraying prior to cleaning.
- For use on colour fast carpets and upholstery.

[Product Information Sheet - How To Use](#)

SPOT LIGHT™

Spot and Stain Remover

750ml

- Produces an absorbent foam which suspends soil and emulsifies fats and oils.
- Suitable for use on colourfast carpets and soft furnishings.

POINTS TO REMEMBER

- Ensure the dry weight of your laundry does not exceed the capacity stated on the rating plate of your appliance.
- Reduce the possibility of static by separating natural and synthetic fibres.
- Over drying fabrics can also cause static and lead to excess creasing.

THERMAL DISINFECTION

The Department of Health recommends a wash cycle of 10 min at 65°C, or at least 3 min at 71°C to disinfect fabrics.

ADDITIONAL INFORMATION

HOW DOES INDUSTRY JUDGE WHETHER A CHEMICAL HAS A HIGH OR LOW IMPACT ON THE ENVIRONMENT?

Every chemical has some impact on the environment, even water can have a detrimental effect. At Evans Vanodine, we have developed an innovative system for classifying each of our products according to their overall environmental impact. Our system scores products based on eight different criteria. The criteria selected are used to create a holistic life cycle view of the processes and product and also align with the UN Sustainable Development Goals.

Every product in the Evans range is analysed using the GreenTick system. The lower the overall product score, the lower the impact on the environment. Products which achieve a low impact rating are identified with a GreenTick logo on the label.

OPTIMUM PERFORMANCE - MINIMUM IMPACT

One advantage of scoring all our products against GreenTick methodology is that it enables us to highlight the lowest impact product within each product category. This helps users to choose the lowest impact product suitable for their cleaning task. Using a low impact product to carry out a cleaning task in the wrong circumstance does not serve the best interest of the environment, therefore it is important to:

- Select the right product for the job.
- Use the recommended dilution rate.
- Dispose of chemical responsibly.

HOW CAN WE SUPPORT YOU?

Cleaning is a vital part of the overall prevention and control process which aims to provide a clinically clean and safe environment for delivering patient care. Areas that are not cleaned properly could aid the transfer of harmful organisms in a healthcare environment, potentially causing infection.

Evans Vanodine produces a range of brochures, leaflets and wallcharts to help customers choose the right product for their needs.

All our literature and product information is available via our website to be viewed or downloaded. Safety Data Sheets and Microbiological Profiles, which substantiate disinfectant claims, are also available on-line.

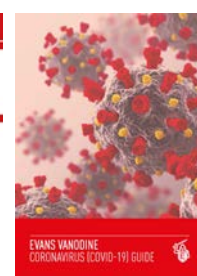

We provide COSHH training via Evans E-learn and a COSHH Risk Assessment Portal is available on request.

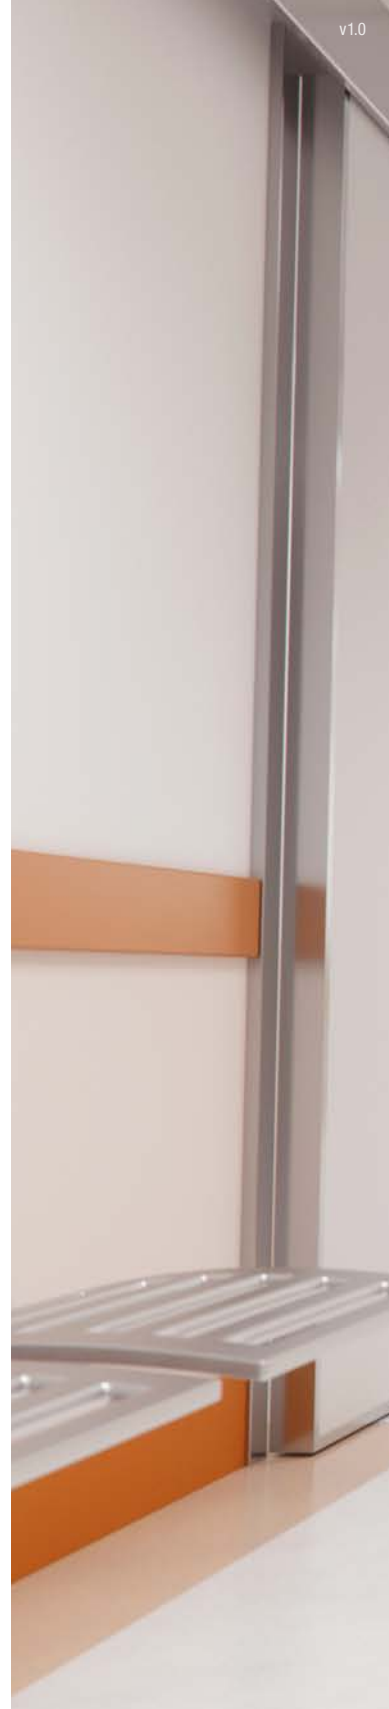

A range of training support and product videos are available via our website.
