Masomint[™]

Ready-to-use teat disinfectant with peppermint oil

Ready-to-use. Chlorhexidine gluconate-based teat disinfectant with peppermint oil. Effective against a range of mastitis causing organisms.

Effective against a range of bacteria. Passes EN 1656.

Formulated with peppermint oil which has a soothing and calming effect on the skin.

- Chlorhexidine Gluconate-based for bactericidal action, effective against a range of mastitis causing organisms, in the presence of milk.
- · Contains Glycerine and Sodium Lactate to help smooth and soften the skin.
- Dark blue dye makes it easy to see that cows have been dipped correctly.

No dilution required.

TEAT DIPPING:

Fill teat cup about two thirds full with the Masomint[™].
Dip teats of every cow immediately after each has been milked, making sure that the full length of the teat is immersed.
Top up with fresh solution as required.
Teat dip cups should be emptied and washed after use. **TEAT SPRAYING:**Immediately after milking, spray the entire surface of each teat of every cow with the product.

COMPOSITION: Contains a blend of chlorhexidine gluconate, nonionic surfactant, glycerine, peppermint oil, sodium lactate & dye.

BIODEGRADABILITY: All surfactants used in Evans Vanodine products comply with the current European Regulations concerning biodegradability & protection of the environment.
